

US History File Specification - Adjusted

Introduction

The US Adjusted History File contains data on each stock that is present in the Ford Universe of stocks as they existed on the last business day of the indicated month except all per share figures, Common Shares Outstanding (SHR), and Average Daily Trading Volume (VOL), which have been adjusted for subsequent stock dividends and splits. Note, that all price variables of certain Canadian stocks (FNI = 2 type stocks) traded on U.S. exchanges have been adjusted by the Canadian exchange rate to make them consistent with other data for those companies.

The files are named FordUSHistAyyyymmdd.txt (where yyyymmdd represents the date the file was created) and delivered in a zip file FordUSHistAyyyymmdd.zip.

All fields are delimited by a tab. Values in the database that are not available are represented by a null field. The first record contains column headings.
